

ISOHEAT®

High Tech Engineering

Bottom drum heater series MIL-HBD-200H

for operating temperatures up to 200°C

Description:

A sturdy, ready to use stainless steel bottom heater meant for standard 200 litre drums.

The bottom heater is used in combination with our drum heaters for heating contents quickly.

The stainless-steel design ensures heavy duty, robust construction, as well as stability under operating conditions.

This ready to-use bottom heater is provided with a heavy duty, mineral-insulated heating cable for transmitting larger thermal output.

With the built in temperature control, the temperature can be adjusted up to 200°C.

Features:

- quick heating
- low surface stress
- stable, robust construction
- high quality, stainless steel construction
- space saving

Technical specification

KM-HBD-200H

nominal voltage	230 V AC
nominal power	1900 W
dimension	Ø 510 x 85 mm
material type	out of stainless steel
protection class	I
system of protection	IP 54
temperature regulation	capillary tube regulator 0-200°C
max. heating element temperature	200°C
power supply cable	2.0 m long with Schuko-plug

Ordering details

type	power W	part.-no.
MIL-HBD-200H	1900	51000303
